RENEWABLE TECHNOLOGIES

Sherpa uses the heat in the air, and transfers it to system terminals in an efficient manner. For each kW of electricity consumed, Sherpa is able to produce over 4 of thermal energy. This means that 75% of energy is free, renewable and clean.

COMPACT TECHNOLOGY

The engineering of components has made it possible to insert a 3-way valve for the management of Domestic Hot Water. The reduced size allow installation inside a kitchen cabinet.

OLIMPIA SPLENDID'S INVERTER DC TECHNOLOGY

SMART CONTROL

The control is extremely flexible and the following interfaces can be used:

1- The programmable thermostat with easy-to-read liquid crystal display. It contains the most advanced functions for controlling the various types of heat pump systems. The operating logic considers the climatic season and the heat load required and consequently adjusts the frequency of the motor on the basis of the difference between outdoor environment temperature and water flow temperature.

2- The remote control

3- Potential-free contacts

FEATURES

Provides DHW with temperatures up to 60 °C

Climatic curves based on outside air temperature: two for cooling and twelve for heating or it's possible to add the customized climatic curves. The climatic curves allow you to change the system temperature according with external climate conditions, adjusting the heat input to the heat requirements of the building in order to obtain energy savings.

Two configurable set points in cooling, **Two configurable set points** in heating.

Anti-freeze protection: managed by the software.

Daily programmer with night mode: Night mode provides energy savings of up to 20%. Complete management of antilegionella cycles.

Remote control panel with possibility of environment temperature and humidity control.

Refrigerant gas R410A.*

CONTROLS

Programmable thermostat
(included as per standard)

Remote control
(additional Code B0812)

- 1 Hydronic module (as per standard):
 - variable displacement pump
 - expansion vessel (2 or 3 litre)
 - automatic venting and safety valve
- 2 Electric control board
- 3 Plate heat exchanger
- 4 Reversible gas circuit (4-way valve)
- 5 Twin-Rotary Inverter DC compressor
- 6 External air sensor probe

* Non hermetically sealed equipment containing fluorinated gas with GWP equivalent 2088
